# International Symposium on Recent Observations and Simulations of the Sun–Earth System (ISROSES)

**Varna, Bulgaria, 17–22 September 2006**

**http://www.isroses.org**

## Scientific topics:

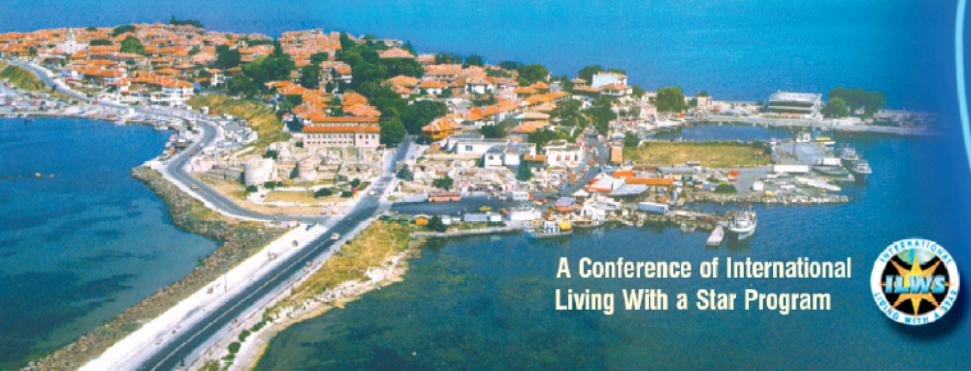
- Understanding the structure and dynamics of the Sun and its interaction with the interstellar medium.
- Understanding the Earth's space environment and its dynamical response to external and internal drivers.
- Predicting the impact of processes on the Sun and in the Earth's space environment on human activities.

### Scientific Organizing Committee:

Tom Bogdan (NCAR, USA)
Joe Borovsky (LANL, USA)
Klaus Galsgaard (NBI, Denmark)
Joe Giacalone (UA, USA)
Tamas Gombosi (U-M, USA)
Marcel Goossens (KUL, Belgium)
Nat Gopalswamy (NASA/GSFC, USA)
Richard Horne (BAS, UK)
Dora Pancheva (UBath, UK)
Vladimir Kuznetsov (IZMIRAN, Russia)
Judit Pap (NASA/GSFC, USA)
Nathan Schwadron (BU, USA)
David Sibeck (NASA/GSFC, USA)

### Principal Conveners:

Vania Jordanova (UNH, USA)
Ilia Roussev (U-M, USA)



A Conference of International Living With a Star Program
